

Divisória STD 80

A divisória modular STD80 é um sistema de divisão de espaço multifuncional, autoportante de perfil de alumínio extrudido, composta por montantes verticais e travessas horizontais com a mesma secção, fixados entre eles através de garra metálica.

A fixação dos painéis de revestimento é através dos perfis externos de acabamento, igualmente de alumínio extrudido, clipados à estrutura interna por meio de molas.

Este sistema é completamente integrado graças à conexão de vários elementos, permitindo assim uma rápida instalação, alteração posterior dos tipos de modulação ou configuração dos gabinetes, e transposição de local se necessário.

Permitem a passagem de cablagens eléctricas, telefónicas, informáticas e de canalizações.

Duplo vidro:

- Vidro monolítico: incolor - opalino - bronze
 - Vidro laminado: incolor - opalino - bronze - verde - azul
- Espessuras permitidas: 4 mm / 5 mm / 6mm / 8mm

Revestimento melaminico:

- Aglomerado revestido a melamina 8 mm
- Espessura permitida: 8 mm

Isolamento acústico:

Isolamento em placa de lã mineral no interior da caixa de ar

Espessura: 50 mm

Densidades: 50 Kg/m³ – 70 Kg/m³ – 100 Kg/m³

Tratamentos de superfície:

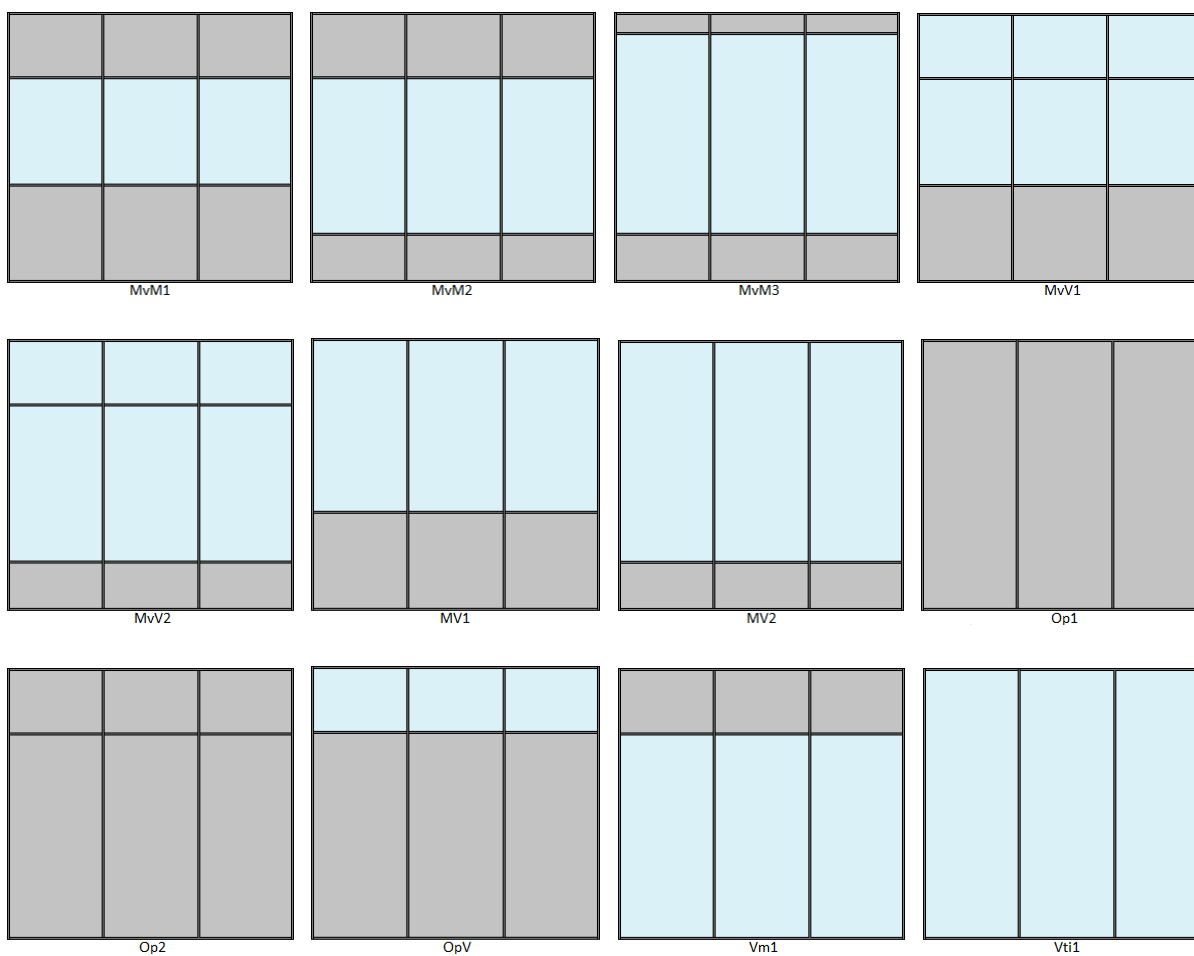

O tratamento dos perfis é feito através de termolacagem, que consiste na pintura com poliéster em pó termoendurecível, em forno de polimerização segundo as normas de qualidade Qualicoat.

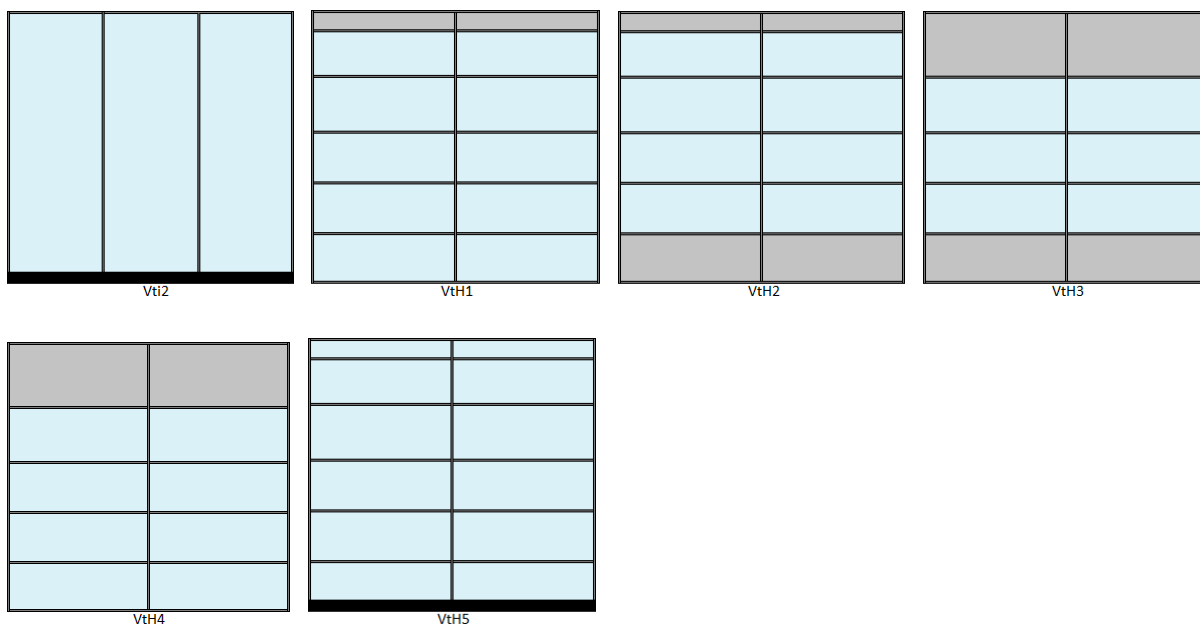

Pré-tratamento contra a corrosão.
